# ComboX, A Combination of Universal Solutions Empowering the Entire Drug Development Process

**Discover and Development**

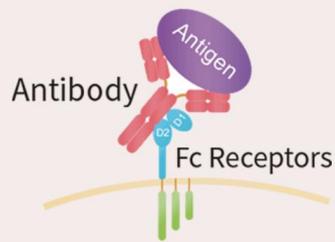

**Manufacturing and Quality Control**

**Preclinical Studies**

**Clinical Studies**

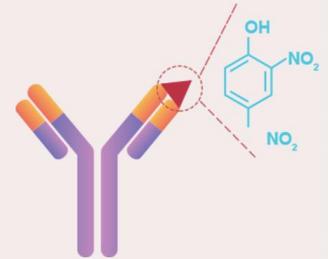

## Fc Receptor Products

- FcRn
- FcγRI/CD64
- FcγRII/CD32
- FcγRIII/CD16
- FcεR

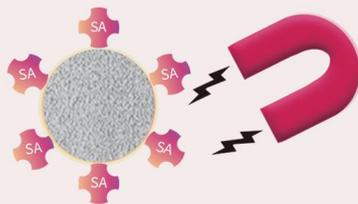

## Isotype Controls

- IgG Isotype Controls
- IgG Fc Proteins
- Serum Albumin

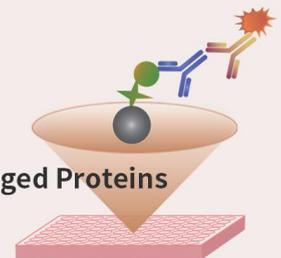

## Streptavidin(SA) Series Products

- SA Proteins
- Labeled SA Proteins
- SA Coated Plates
- SA Magnetic Beads

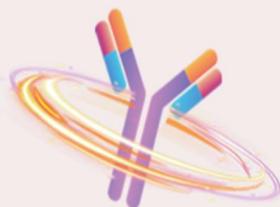

## Nickel Coated Plates

- 12×8-Well Strips
- Clear, White Frame
- Designed for Binding His-tagged Proteins

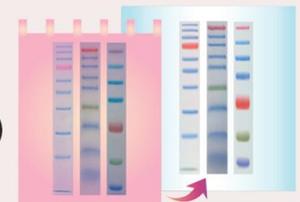

## Universal Antibodies

- Anti-His Antibody
- Anti-Human IgG Antibody
- Anti-MMAE Antibody

## Star Ribbon Pre-stained Protein Marker

- Wide MW Range(8-180kDa)
- Low MW Range(2.7-40kDa)
- High MW Range(40-275kDa)

**Universal Antibodies**

**SA Series Products**

**Nickel Coated Plates**

**Pre-stained Protein Marker**
